Physical Schwarzschild initial gauge — no time evolution
Initial shift compared with spherical solver
1D N=2049, t=0
3D block N=10
3D block N=12
Radial shift βʳ
Compactified radius r
Actual equal-radius angular scatter
3D block N=10
3D block N=12
Standard deviation of βʳ
Compactified radius r
Original bulk + Dirichlet-row solve
3D block N=10
3D block N=12
RMS solve target
Recomputed residual RMS
GMRES iteration
Metric-connection rate: boundary still fails
Scri maximum (failure)
All-node RMS, including scri
Bulk RMS
Absolute metric-connection rate
Nodes per block direction
