V6 puncture: failed at 2.8905 M; grey region has no accepted 3D horizon
Relative horizon mass error
|M_AH / M − 1|
3D n16
1D N513
t / M
Accepted horizon coordinate radius
Compactified radius
3D n16
1D N513
t / M
Exterior constraints (different norm weights)
RMS
3D H, volume weights
3D radial M, volume weights
1D H, radial weights
1D radial M, radial weights
t / M
Maximum relative null closure residual
Relative residual
3D surface
3D ghosts
1D endpoint
t / M
Diagnostic curves stop at 2.85 M. Unequal constraint weights preclude direct error-ratio/convergence claims.
