Puncture evolution: N16 and N24 through 3M
Same log-chi/log-lapse scheme through 3M; dt/dx = 0.04444; core spacing ratio = 1.5
Coordinate horizon radius
r_{AH} (code units)
N16
N24
Accepted horizon areal-radius error
$|R_{AH}/(2M) - 1|$
Horizon expansion residual
RMS expansion
Acceptance tolerance
Scri null residual (segment running maxima)
Residual / 10^{-15}
Surface
Ghost
t/M
t/M
Filled circles: accepted horizons. Open circles: complete candidates above tolerance.
Missing accepted-horizon diagnostics are left as gaps; no gap interpolation.
