RMS within each radial band
N24 / N16
N32 / N24
Refined / coarser band RMS
Compactified coordinate radius r
Gray: excluded interior (common cutoff r = 0.0753). Purple: core–shell blend r = 0.16–0.18.
Yellow: dominant outer-shell band r = 0.6–0.8. Dotted: shell interfaces r = 0.45, 0.75.
Ratios below 1 mean improvement; unequal grid ratios preclude a single factor-two order estimate.
