Minkowski n16, dt=0.0005: projection does not suppress the growing mode
Histories end at t=0.45; last accepted times: 0.4895 (V1), 0.4850 (V2)
State deviation; shaded fit-amplitude window
Maximum stored-field deviation
Coordinate time
Original V1
Final-stage projection V2
Constraint norms; early H near cancellation floor
Coordinate-volume RMS
Original V1 H
Original V1 M
Final-stage projection V2 H
Final-stage projection V2 M
Projected volume algebraic residuals
Maximum residual
max |det(g)−1|
max |tr(g⁻¹A)|
Null closure at recorded successful evaluations
1e−15
Relative null residual
Original V1 surface
Original V1 ghost
Final-stage projection V2 surface
Final-stage projection V2 ghost
