Normal pole derivative — manufactured consistency study
radial p1 — off regularity
angular p1 — off regularity
radial p2 — analytic N=C=0
angular p2 — analytic N=C=0
Absolute L2 error (reference area, Frobenius)
Existing AD; last order 4.07
Sampled native N; last order 2.87
Sampled analytic N; last order 5.00
Existing AD; last order 3.77
Sampled native N; last order 4.74
Sampled analytic N; last order 4.78
Existing AD; last order 3.77
Sampled native N; last order 4.51
Sampled analytic N; last order 4.77
Cells per block axis n
Four resolutions; observed orders are not imposed. No evolution or stability test.
p1 full-rate target includes its unchanged h-dependent penalties; p2 has zero analytic pole and regularity traces.
